JOURNAL OF ELASTICITY

Contents of Vol. 24, 1990

C.B. Hwu and T.C.T. Ting: Solutions for the anisotropic elastic wedge at critical wedge angles 1

Y.C. Angel: On the static and dynamic equilibrium of concentrated loads in linear acoustics and linear elasticity 21

H. Ito: Extended Korn's inequalities and the associated best possible constants 43

N. Kalyanasundaram, D.F. Parker and E.A. David: The spreading of nonlinear elastic surface waves 79

J.G. Simmonds and M.A. Horn: Asymptotic analysis of the nonlinear equations for an infinite, rubber-like slab under an equilibrated vertical line load 105

L. Wheeler: On the derivatives of the stretch and rotation with respect to the deformation gradient 129

M.F. Beatty and R. Bhattacharyya: Poynting oscillations of a rigid disk supported by a neo-Hookean shaft 135

L.M. Brock and J.-S. Wu: Transient studies of screw and edge dislocation generation at crack edges 187

T.J. Healey: Large rotating states of a conducting elastic wire in a magnetic field: subtle symmetry and multiparameter bifurcation 211

A.J. Karwowski: Asymptotic models for a long, elastic cylinder 229

Research notes

M. Vianello: On the active part of the stress for elastic materials with internal constraints 289

D. Levi and C. Rogers: Group invariance of a neo-Hookean system: incorporation of stretch change 295
